

# KöR™ Whitening

The Next Evolution in Teeth Whitening

{KÖR®}  
Whitening

## KöR™ Whitening

- The most powerful whitening technique
- Handles even severely stained teeth
- No sensitivity for most patients!

## We are proud to offer a new teeth whitening procedure called KöR Whitening.

Most whitening methods work extremely well in competent professional hands; however, even the best treatments sometimes don't work on severely stained teeth. An example of this is the staining you may have if you took the antibiotic tetracycline. But now, with KöR Whitening, even these severely stained teeth can go brilliantly white. If you've ever been disappointed in the results from other methods, you will be amazed at this technique.

KöR Whitening uses extensive scientific study to eliminate factors (such as saliva exposure) that reduce effectiveness so the whitening gel can do its job more thoroughly and efficiently. The result is rejuvenated enamel and truly amazing brightness!

We also offer custom whitening trays, made in our own lab.
