

Dazzling Smile Makeovers

Dental veneers are thin, custom-made shells created from porcelain or a composite material that attach to the front of your teeth. They are a solution for the following common problems:

- Crooked or uneven teeth
- Chips or cracks
- Abnormal spacing
- Worn tooth enamel
- Stains or discoloration

Veneers are durable, can help strengthen weak teeth, and are typically completed in as little as two office visits. The ceramic of porcelain veneers mimics the natural enamel covering of your teeth, offering the most realistic look. They last up to 15 years and are resistant to stains – even from coffee, wine, or tobacco.

We Appreciate Referrals!

Perhaps you have already experienced the transformation to your smile – and your confidence! – that cosmetic dentistry can provide. Please feel free to tell others about your experience with us, and give them this brochure so they can contact us to schedule a consultation.

Don't Hide Your Smile! Remake It!

Cosmetic dentistry is very different than it used to be. Our office has made cosmetic dentistry a priority, and incredible cosmetic improvements can easily be made. We have years of experience creating cosmetic changes that look natural, never fake.

Are you tired of those old porcelain crowns that have that “FALSE” look? Or maybe they have a dark edge at the gum line. Just ask us about our lifelike all-ceramic crowns and veneers that are virtually indistinguishable from natural teeth.

We emphasize the cosmetic aspect of our work, because we know that when your smile looks good, you feel good!

Veneers, bonding, whitening, and crowns can give you the beautiful smile you were meant to have.

Your Perfect smile

Now it's easier and more affordable than ever!

Yes, Cosmetic Dentistry Is Affordable!

We know paying for your care is an important concern for you. We will work with you on a financial plan to help you get the healthy, beautiful smile you deserve. If you have dental insurance, we will submit the claim and ensure you get the maximum benefits to which you're entitled. We offer interest-deferred payment plans that you can apply for right in our office, as well as prepayment discounts if you decide to pay for your treatment up front. We also, of course, accept credit cards, cash, and checks, and we can discuss phasing treatment over time to spread out the costs.

Achieving a Bright, White Smile

Teeth whitening is one of the biggest options chosen by our patients for a renewed smile. It is a fact that your teeth will darken over time due to any number of factors. Beverages such as coffee, tea, soda, and wine can alter the color of your teeth. Certain childhood illnesses or medications may also cause discoloration, as can tobacco or improper oral hygiene.

You don't have to live with stained or darkened teeth. While there are numerous whitening products available in stores, those solutions don't really work. Our dental team is ready to provide you with a variety of options to help you achieve a beautifully white smile. Don't waste time and money on over-the-counter products. Call us today to set up an appointment.

Making a Brilliant First Impression

The first thing most people notice about you is your smile. If you have teeth that have been damaged by time, disease, or injury, you have options to restore your teeth and help you achieve a beautiful smile.

A winning smile is not only good for your appearance, it may also be important to your health. Damaged teeth can lead to other problems including tooth decay, an uneven bite, or stress on surrounding teeth. If you have worn, uneven, chipped, or broken teeth, contact our office to find out how to restore your teeth to improve your health and give you the beautiful smile you deserve.

For Strength and Beauty

Crowns are sometimes necessary to save a broken or worn-down tooth when a simple filling will not restore it to full functionality. A crown will save and even add strength to the damaged tooth. Our crowns are made of the best quality materials available. They look so natural, you won't be able to distinguish them from a real tooth.

Small Changes, Big Results

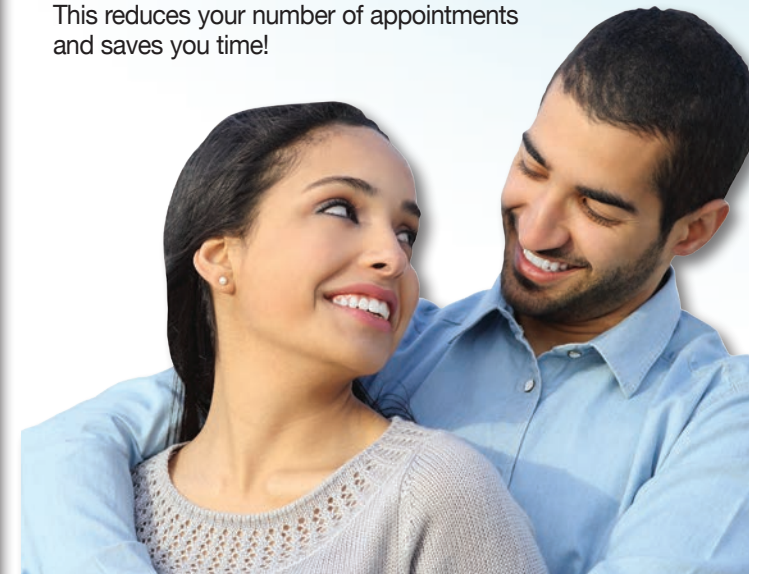

If you have chipped or cracked teeth, gaps or spaces between teeth, and/or discolored areas or spots, composite bonding might be just the thing. A resin is used to address any of these small problems, matching the shade of your natural tooth. This is the most affordable way to fix your smile!

Do You Have Dental Insurance?

We accept most fee-for-service dental plans. Even though dental insurance is a private arrangement between you and your company, we will file your claim, handle all the paperwork, and help you get maximum insurance benefits. Also ask about our financing options.

We Do Great Cosmetic Dentistry – And That's Not All!

Our patients are the most important element of our practice, and addressing your unique needs to help you achieve your goals is our priority. That means we not only value your business, we value your time, and we take that well beyond avoiding a long wait before your appointment begins. Our entire team has all undergone extensive training to enable us to address any of your dental needs, from routine dental care to a completely new smile, right here in our office. This reduces your number of appointments and saves you time!
